Technical University Dresden (TUD) INCLUSION- a brief overview

One aspect of the diversity of opportunities concerns **the inclusion of people with disabilities and chronic diseases.**

Again and again this confronts us with the situation of having to question things that are self-evident, to train ourselves for new ways and possibilities, so that the integration of people with disabilities and chronic diseases into the routines and demands of our everyday life can succeed....

In the area of inclusion the following main topics are identified at the TU Dresden

Main topics regarding Inclusion

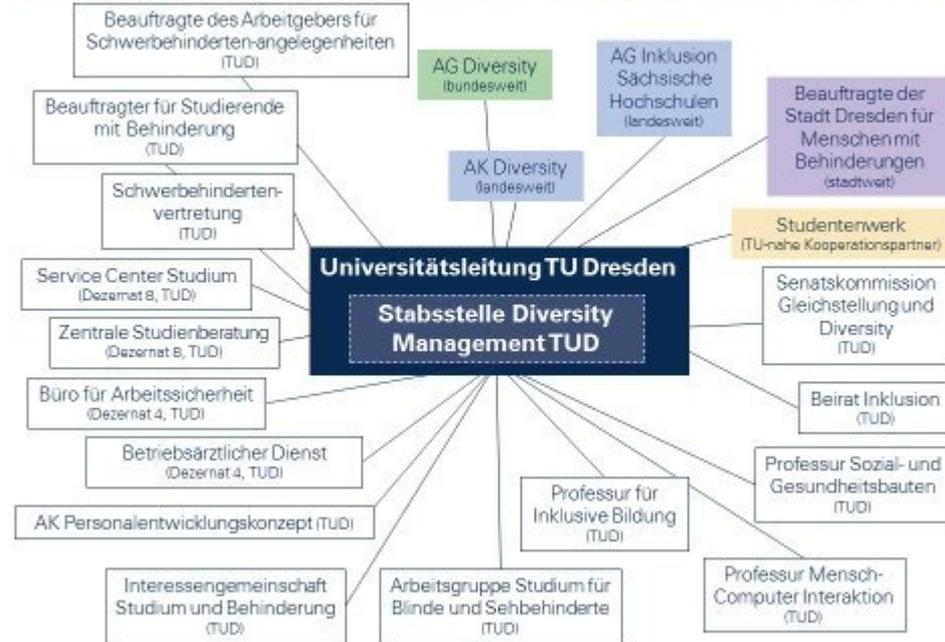

- [Accessibility](#)
- [Study](#)
- [Job](#)
- [Teaching and Research](#)
- [Action Plan](#)
- [Special funds inclusion](#)

TU Dresden is growing by the diversity of its members and is committed to inclusion: the fair, non-discriminatory and self-determined participation of people with disabilities and chronic diseases in all topics within the university and contribute to the development of an inclusive university.

Networking of the staff unit Diversity Management in the field of inclusion

In order to achieve the goal of an inclusive university, the Staff Unit Diversity Management is closely networked with numerous agents within and outside the TU Dresden. The work in the thematic field is only possible and successful through the intensive and good cooperation with the diverse partners.

ACCESSIBILITY

Understanding of accessibility

As part of "Accessibility", the focus is initially on the structural accessibility of the university. However, the UN Convention on the Rights of Persons with Disabilities broadens the concept of "importance of accessibility to the physical, social, economic and cultural environment, to health and education and to information and communication" for persons with disabilities and chronic diseases (UN CRPD Preamble, Sentence v) and thus includes many other aspects and features of accessibility. Not only structural, but also communicative, organisational, didactical, structural and conceptual obstacles are important.
